WEDNESDAY MORNING, NOV. 26, 1851.

To the Whigs of Newport County.

We are no alarmist and we never shoot danger unless it actually exists; and in addressing ourselves at this time and in this manner, to the Whigs of the County of Newport, particularly, am to the Whigs of the State, generally,we speak from a sense of duty, and because we are fully, and for ample cause impressed with the belief that it is time that the whole Whig strength was rallied and brought into action.

We know that our opponents are awake, and at work in carnest; they are making the most desperate efforts, and they are canvassing this town in a most thorough, though very quiet, manner, and are registering every man who is available and who will be competent to vote at the ensuing election; they have already registered an unusually large number. Of course, they have many objects in view; they desire to elect their State officers, and also to carry both branches of the General Assembly, at the April election, because that General Assembly will have an Uni ted States Semator to elect, for the term of six years from the 4th of March, 1853 In addition to all this, the Presidential election takes place next. November, and it is important for them to have their full strength ready for action on that occasion; and none can vote on that question unless they are registered by the last of December. They will have money enough, for Gov. Allen, Gov. Lawrence, Mr. Wright and many others, who are in office, and who are seeking for higher honors, and many who are not in office, as yet, will spend their money as truely as water; and they will as liberally contribute one hundred thousand dollars in the coming contests, as they did twenty-five thousand dollars at the last April election.

It is not merely a few of the party who are at work, but the great body are actively in motion, and are using all manner of means to strengthen the party, and present a formidable appear ance at the polis.

We trust that the Whige will take counsel of our opponents, in this respect, and work with equal and even surpassing energy. We have the strength and we have the men, and if we arouse and do our duty, all will be well. But unless great exertions are made, and unless the whole Whig party come menfully to the work, and are resolved to put down their opponents, we shall certainly be defeated. We know that Rhode Island is eminently and thoroughly a Whig State, and the success of all her interests are dependent upon the supremacy of the doctrines and principles of the Whig party.

The locofocos expect to accomplish much through the aid of the se-called Secret Ballot,-and a more sneaking and contemptible law never disgraced a Statute book. It is a law which opens the door to the grossest frauds, and which may be outrageously used to de fraud many honest men out of their votes. This law is but one specimen of locofoca Reform, and unless our party arouse to action, and thoroughly awake from the lethargy which benumbed them last Spring, they will have specimens of locolece Reform, of the latest Tammany Hall edition, which will make them repent their indifference and un pardonable supineness when it is too late to remedy the cvil. Once more, we appeal to all. Whigs to arouse and go ectiously to work for the redemption of Rhode Island from the misrule of locofocaism.

Let our Ward Committees most and let them appoint sub-committees, and let each member have a certain district assigned him,-and when this is done let him faithfully scour every part of it and be sure that he obtains the name of every Whig who will be qualified by residence and age to vote at the April election; and when this is done, let him see that all such are properly and correctly registered in the Town Clerk's Office; be sure that you obtain each name in full and that it is correctly spelled. If all this is done, not only it this tawn, but throughout the County, and also is every County of the State,then, when the decisive day comes, we shall be prepared for our encuries, and we will most gloriously redeem the State, and restore to her her ancient good name and honorable political character.

This morning about 11 o'clock a large congregation assembled at the Emptist Church, in West Sixteenthist, to attend the funeral ceremonies performed by Rev. Joseph Taggart, pastor, over the remains of Miss Penchard Miss Devoc, and the two children of Mrs. Woolley .--The reverend gentleman, in the course of his remarks, was very much affected, yet he endeavored, as far as he could, yet ne enceivored, as lar as ne could, to console the bereaved parents for their loss, by reminding them that God their after had a prior claim to their possession. God, said he, gave me but the child, and that he took away. He had a right to do so. He took it away and left me childless, and I had to kis the left me childless, and I had to kiss the

rod that had smitten me. In alluding to the deceased he was In alluding to the deceased he was reminded of a passage of Scripture that was applicable to them, "Lovely in their lives, in their death they were not separated." They were always together, just as they are now, whenever their domestic duties allowed them. They were pursuing the same studies, at the same school, and how far apart they fell in the latal embrace of death, he know not. But it seemed to him that hearts united by one common tie such as this, would if fright had not paralyzed their faculties have stubbed against each other in the last clasp of death. The address of the reverend gendernan was listened to with much attention.

The velvet moss will grow on a sterile rock, the missletoe flourishes on the na ked branches, the ivy clings to the moul-dering ruins. the pine and ceduc remain tresh and fadeless amid the meditations of the receding year; and, Heaven be, praised, something green, something beautiful to see and grateful to the soul, will, in the darkest hour of late, still twine its tendrils around the crumbling altars and broken arches of the desolate temples of the human heart.

THE REASON WHY THE WATER OF THE DEAD SEA IS UNFITTED TO SUPPORT LIFE.—Mr. Robert M. Graves, M. D. has communicated to the Edinburgh Philosophical Journal, a very interesting article on the causes why the waters of the Dead Sea are decutive of fish and other marine animals. The Dead and other many thing thing within its fatal bounderies, yet this salt sea, so famous in story, is supplied with water from fresh water rivers which abound in fish and vegetables. The surface of the Dead Sea is 1300 feet below the level of the Meditterranean, is 1600 teet deep. 60 miles long, and 9 broad. It receives all the waters of the Sea of Galilee. A correct chart of this old lake was never given to the world until the expedition under Lieut Lynch surveyed it. The

given to the world unit the expectation under Lieut Lynch surveyed it. The full credit of this important fact is given to our country by Mr. Graves.

It has been stated by Dr. Robinson and Mr. Warburton, that the shores of the Dead Sea were non-volcanic, but the expedition brought home specimens of terms and service these refutings former of lave and scoria, thus reluting former accounts.

There is another sea in the world just There is another sea in the wind just like the Dead Sea of Sodom; this is the Great Lake of the Mormon country, discovered and explored by Lieut Fremont. This lake contains no living thing within its bosom, and it also receives the fresh waters of Lake Utah.

The waters of the Dead Sea of Jor

The waters of the Dead Sea of Jor The waters of the Dean Set of Did dan contain 24 per cent of saline matter, consisting of chlorides of patassium, sadium, calcium, inagnesium, iron, man-ganese, with bromide of magnesium.— This saline impregnation accounts for the absence of all vegetable and animal life. The waters of the Great American Salt Lake are nearly of the same comnosition, and present similar phenomena to that of the Sen of Sodom.

SILENT INPLUENCE. -- It is the bubbling spring which flows gently, the little riv-ulet which runs along, day and night, by the farm-house, that is useful, rather than the swollen flood, or the warring cataract. Ningara excites our wonder, and we stand amazed at the power and greatness of Got there, as he "pours it from his hollow hand." But one Ningara is enough for the continent, or the world—while the same world requires thousands and tens of thousands of silver fountains and gentle flowing rivulets that water every farm and meadow, and day and every night, with their gentle, quiet beauty. So with the acts of our lives. It is not by great deeds, like those of the maxture that and the like those every garden, and that shall llow every of the martyrs, that good is to be done; it is by the done; it is by the distant temper, the meck forbearance, the spirit of forgiveness, in the thusband, the wife, the father, the mother the brother, the sister, the friend, the neighbor, that good is to be done.

A Nose PUT on .- A young lad, about sixteen years of age, who lost an eye, and had his nose entirely taken off by a and had his lose either y date geneshot, accidentally some three years ago, in Clermont County, applied at the Commercial Hospital a few days since to ascertain whether an artificial nose ould not be fixed on him. He presented a most repulsive spectacle—a cavity through which the intetint of a portion of the head could be seen, occupying the place of the nose. When it was suggested to him that he would have to un dergo a severe operation, he expressed no apprehensions, and was even willing to dispense with the chloroform process, to dispense with the entormorm process, which is commanly applied in such enses. Dr. Mussy performed the operation in a skillful manner, making an incision some two inches wide in the forchead, and, dentified the dispense. drawing the flesh down, formed a shapely, substantial nesc-the great improve uent in the boy's appearance showing the importance of the masal organ. The wound in the forehead is quickly healing up, and in a short time the youth will be able to "follow his nose," as heretofore.—Cincinnati Com, 14th.
